speedsheet

**maconomy mobile speedsheet ensures that no billable hours are lost on the road**

Employees today are increasingly mobile – they do business wherever possible. But does this make you invoice more hours and maximise your revenue?

Maybe not. Getting employees to submit their time accurately and on time is a challenge, as time sheets are often filled in at the end of the week. Furthermore, busy employees can easily forget to keep track of time, leaving time unregistered and therefore never invoiced. But there is no excuse anymore – because Maconomy has taken mobility to a new level with version 2 of the mobile product for X1!

With the maconomy mobile speedsheet we have extended the possibilities of time registration and review by bringing the full speedsheet to your mobile phone.

### **As easy as sending an SMS**

Being available wherever you are, directly on your mobile, the maconomy mobile speedsheet is an invaluable tool for those who are out on the road or with clients - and for those who want to be at the forefront of the latest time registration technology.

Register your time as it occurs and increase your invoiceable hours as well as the accuracy of your project follow-up. The new maconomy mobile speedsheet makes it just as easy to review your timesheet, register new entries, and submit your timesheet as to send an SMS. Not once a week or at the end of each month, but every single day or hour.

### **Catch time in a few easy steps**

1. Log in using username and password or simple to use PIN (Kerberos single sign on support will also be available)
2. Review the status of your timesheets from the calendar view
3. Add new entries using your job/product favourites or update existing entries from maconomy
4. Submit your timesheet direct from your phone

The mobile speedsheet works on or offline with connection direct to the maconomy server being made instantly when available.

### Example of use

Paul works as a consultant for a large international company selling IT consulting services and is often to be found at customer sites. He intends to register his time after the completion of each task, but after a hectic day with phone calls, e-mails, meetings, etc., he realises that he has not registered one single hour. With only 15 minutes left before his train leaves, he decides to postpone the time registration till the day after.

However, that day turned out to be just as busy, and so did the following day. By the end of the week, Paul tries to review his working week, but as usual, the number of hours he spent on the individual tasks ends up being based on the broad picture of the week, and as a result is never completely accurate.

Paul wants a quick and easy way to register his time, so he does not have to struggle to remember the exact time he started working, participated in meetings, etc. and went home for the day. This is easily done with the maconomy mobile speedsheet. He was originally using his PC to record time, but now he can pick a Favourite in his mobile, type in the number of hours spent and register the information in his mobile phone. Carrying his mobile with him all the time, he can register time as it occurs, and wherever he is, on the train, in the car, and so on. The mobile SpeedSheet allows him to enter hours when they are still fresh in his mind and immediately updates maconomy with the information.

### Benefits

- As easy and fast as sending an SMS
- Time can be captured anywhere, anytime
- Mobility means flexibility, which means increased employee satisfaction
- Time registration is no longer a tedious, administrative task
- Cost-effective – no need to invest in expensive mobile phones, as the application runs on virtually all mobile phones released in the past 3 years
- Better basis for documentation when invoicing customers, as time can be captured as it occurs
- Improved data validity and thus enhanced transparency for customers

Mobile SpeedSheet works with BlackBerry® smartphones as well as a wide range of other phones.

## organic business solutions

Maconomy is a global provider of industry-specific business solutions for Professional Services Organisations.
